

TRIPLE TWISTED MESH

The product

Triple twisted, chicken wire mesh or hexagonal mesh, this fence can be used to enclose lands for small animals.

Although increasingly used for decorative purposes, triple twisted mesh is primarily the ideal solution for fencing small pens or building small cages. This flexible wire mesh, with its "thin" wires and small mesh, is of medium resistance. It's made up of a winding of wires that form the mesh.

Triple twisted mesh is also suitable for use in hunting and fishing, thanks to the specific "regular" buckling.

Characteristics

Galvanised ● Green 6005 ●

Heavy galvanisation after manufacturing

FINISH	MESH (mm)	DIAMETER (mm)	HEIGHT (m)	LENGTH (m)	WEIGHT (kg)
