

CAMELEON COMPOSITE KIT

The product

Cameleon composite privacy slats kit is an ideal solution for filling a fence panel. Its slats can be woven into the panel mesh or simply slid in and held in place with V reinforcements. This kit is especially suitable for residential environments.

Sbfm's advice : to reduce wind pressure, we recommend removing every other slat when winds exceed 80 km/h.

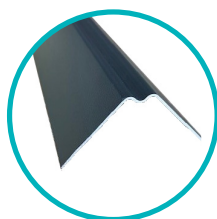

Characteristics

- Composite straight or braided slats
- 1,23 m finishing rails, grey 7016
- Low aluminium supports
- if straight kit (no woven slats) : optional 1,23 m V reinforcements (2 per fold), grey 7016
