

RETRACTABLE BOLLARDS

The product

Retractable bollards delimit, secure and control access to a defined area. Pedestrian streets, parking lots, shops, fire department access, high-traffic or high-risk areas, parks and gardens... it fits easily into any type of environment.

Mechanical or electric, retractable bollards are available in different models to meet a variety of uses and needs.

Regardless of its level of resistance, it's the ideal solution for providing a dissuasive and security feature and for addressing access control issues in urban areas.

Characteristics

- Mechanical or automatic bollard
- High resistance ensuring continuity of operation after an impact
- Compliant with NFP 98-310 and PMR standards
