

Heavy wall spikes

## MEDIUM & HEAVY WALL SPIKES

### The product

Wall spikes are a security system for industrial and sensitive sites. This type of obstacle consists of support bars topped with sharp spikes.

Generally attached to walls, fences, gates or roofs, wall spikes protect high-risk environments and prevent climbing.

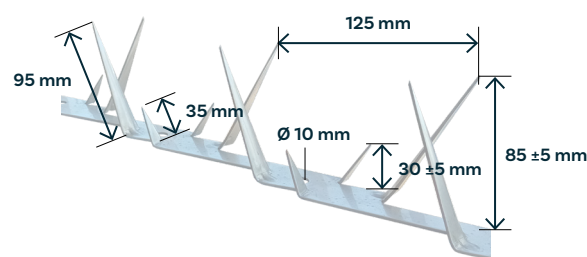

The Medium model (picture) consists of 2 types of angled spikes, one 35 mm high and the other 95 mm high. They are positioned at regular intervals of 125 mm.

The Heavy model consists of 3 types of spikes : 2 straight spikes measuring 35 mm and 110 mm in height and 1 angled spike measuring 90 mm. The space between the tallest spikes is 78.3 mm.

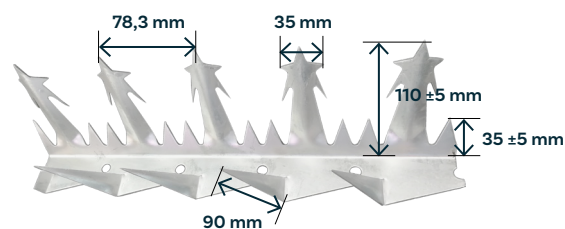

### Characteristics

- Support length : 1250 mm
- Support width : 45 mm (Medium), 50 mm (Heavy)
- Steel thickness : 2 mm
- Finish : galvanised
- Unit weight : 0.85 kg (Medium), 1.75 kg (Heavy)
