

POULTRY FARMING MESH

The product

Poultry farming mesh protects ducks, chickens and other poultry from predators. Its chain link fence lies on the ground for 50 cm to prevent the animals from digging.

Fox-proof posts and tension wires are also installed all around the fence to reinforce protection.

Characteristics

- 50 mm mesh chain link fence, Ø2,1 mm
Height : 2 m of which 50 cm lies flat on the ground, outside the property
- 30x30 mm T posts, height 2 m - Place one every 2 ml
- Maxiclo clamp post and heel brace arm, height 2,10 m - Place one at each corner and every 25 lm
- Fox-proof posts
