

KNOTTED WIRE MESH

The product

Knotted wire mesh, also known as sheep fence, is ideal for enclosing agricultural areas or delimiting zones by preventing animals from passing through.

With its knotted and degressive rectangular mesh, knotted wire mesh or sheep fence prevents animal from passing through and is perfect for securing livestock fields or hunting areas.

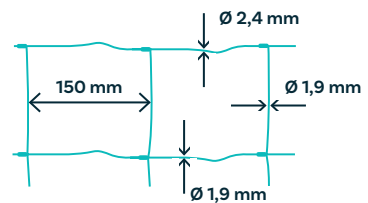

Its flexibility allows it to be installed on any soil and fixed to any type of support. Its galvanised finish makes it highly resistant over time.

SBFM's advice : we recommend installing knotted wire mesh on wood posts with staples.

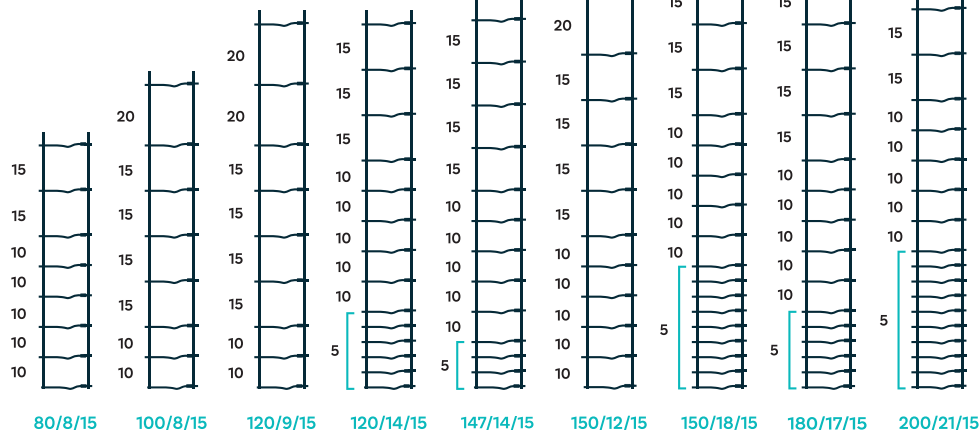

Characteristics

Galvanised ●

FINISH	HEIGHT (cm)	NB. OF HORIZONTAL WIRES	MESH WIDTH (cm)	WIRE DIAMETER (mm)	WEIGHT (kg)	LENGTH (LM)
Heavy Galvanised Zinc content 240g/m ²	80	8	15	Header wires : 2,4 Other wires : 1,9	18,80	50
	100	8			20,20	
	120	9			23,10	
		14			30,30	
	147	14			32,20	
	150	12			29,70	
		18			38,40	
	180	17			45,00	
	200	21			48,00	

- Ideal for marking large livestock areas, paddocks, construction site and especially sheep stocking
- The knot makes the fence more rigid
- Its degressive mesh prevents animal from passing through
- High resistance to weather and external elements thanks to the rich galvanised finish

WIRE MESH
