

PVC COATED WELDED WIRE

The product

A clever combination of design and solidity, PVC coated welded wire is particularly recommended for residential areas or, depending on its finish, for securing industrial sites.

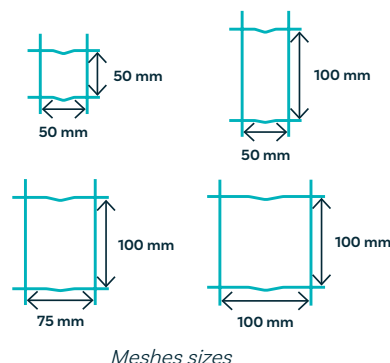

Its welded and notched mesh ensures high rigidity and maximum tension.

Additional information from SBFM : be sure to position the mesh waves with the points facing downwards to drain rainwater and thus provide better resistance to corrosion.

Characteristics

Green 6005 ● Grey 7016 ●

FINISH	COLORS	HEADER WIRE	MESH (mm)	DIAMETER (mm)	HEIGHT (mm)	LENGTH (mm)	WEIGHT (kg)
PLASTIPROMO	Green 6005	2	100x100	2,2	1	20	8,12
					1,2		9,75
					1,5		12,19
PLASTILIGHT	Green 6005	2	100x75		1	25	12,38
					1,2		14,76
					1,5		18,57
PLASTIFENCE	Green 6005 Grey 7016	3	100x50		1		16,66
					1,2		21
					1,5		24,8
					1,8		30
					2		33
PLASTICITY	Green 6005 Grey 7016	3		0,6	12,63		
				0,8	19,5		
				1	21,06		
				1,2	25,27		
				1,5	31,6		
				1,8	37,91		
PLASTIFORT	Green 6005	2		50x50	2,7 / 3,0		2
						1	35,91
						1,2	43,09
						1,5	53,86
			1,8			64,63	
					2	71,81	

Meshes sizes

- 2 or 3 header wires at the top of the fence
- Easy installation with the guarantee of a tight mesh
- PVC coating and notched mesh ensure the durability of the fence
- 4 mesh sizes available : 50x50 mm - 100x50 mm - 100x75 mm et 100x100 mm
- Fixing with T posts or round posts (Multigraf)
