

ROTATIVE HARROW

The product

A moving alternative to wall spikes, rotative harrow are even more aggressive and effective at securing industrial sites like factories or warehouses that present significant risks.

Attached to a fence, wall or gate, these rows of sharp spikes positioned on a rotating axis reliably prevent anyone from crossing the installation.

Characteristics

- 2 posts are placed at each end of the rows to facilitate their installation.
- Can be installed on a wall, fence or gate.
