

WOOD PRIVACY SLATS - 7 mm

The product

Wood privacy slats are the perfect blend of tradition and modernity, protecting spaces from onlookers.

Autoclave-treated, SBFM wood privacy slats are a great way to block views and wind in outdoor spaces. Aesthetics, combining tradition and modernity and highly trendy, they are weather-resistant and adapt to different types of environments.

Easy to install, they slide into the mesh of fence panels.

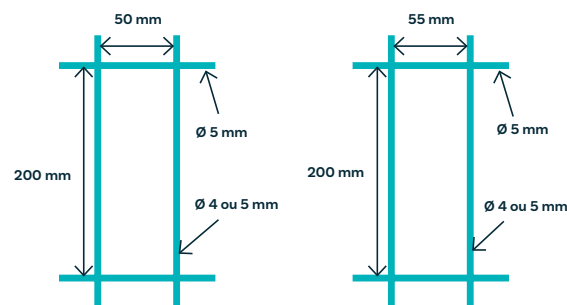

Wood stands the test of time, offering a high-quality solution that protects spaces with elegance.

Characteristics

Autoclave-treated pine

- Class 4 autoclave-treated wood slats, anti-blue stain and anti-termite (NF B50-105-3 standards) - thickness 7 mm
- Length of trapezoidal laths 1,25 m
- Compatible with 200 x 50 mm mesh fence panel (center distance) and 200 x 55 mm mesh (center distance)
- 2 smaller slats are inserted at the ends of the panels
- The slats are inserted into the panels and secured to the horizontal profiles using staples or screws (not supplied)
