

NOISE BARRIER

Model with acrylic glass

The products

Noise barriers are the ideal solution for noise pollution.

This type of fence is effective for protecting areas located along roads, railways and near industrial, commercial and residential zones.

These noise barriers also provide security and dissuasion thanks to their height and solid appearance.

Noise barriers are available in 2 versions :

- Opaque, single or double-sided with PVC coating (photo)
- Made of acrylic glass to maintain visibility through the panel

Noise barriers can be covered with vegetation and blend easily into any environment or landscape.
