

WOODEN POST

The product

The chestnut or acacia wooden post is used to support flexible wire mesh.

Tapered to a point to make installation easier, wooden posts allow all types of flexible fences, like split stake fence, knotted wire mesh or barbed wire, to be easily fixed using staples.

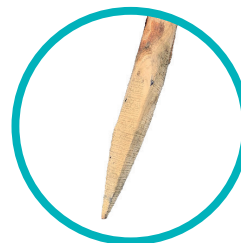

Characteristics

Acacia ● Chestnut ●

- Height : 1,00 to 2,50 m
- Fitted at the bottom
- Suitable for all types of installation : fences, vegetable gardens, decorative features, path edging, etc.
