

REVOLVING GATE

The product

Revolving gates secure and filter access to industrial, military and logistics sites, public buildings and schools.

With its horizontal arms attached to a central axis, revolving gates facilitate the flow of pedestrians at a steady pace.

Revolving gates are available as single or double passage and with PMR access. Depending on the model, it allows two-way or one-way traffic.

It's quick and easy to install as it's delivered fully assembled.
